# Trafalgar Studio S403

This soundproofed mixed media space is now fully equipped to capture still and moving portrait imagery impeccably lit from both angles against a green screen background, while reading your pre-recorded notes from a teleprompter. Seamlessly capture audio together or separately using on-camera, clip-on lavalier, or podcast microphones. Audio and video footage is able to be immediately edited and composited on one of three available Mac or Windows computer workstations running applications such as Camtasia and Adobe's Creative Cloud suite.

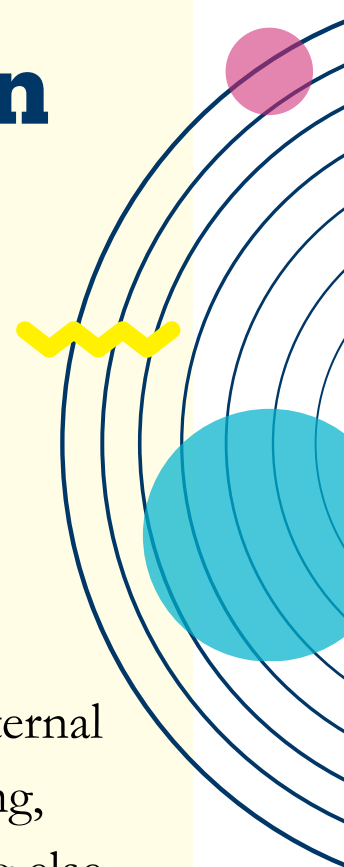

Because the Adobe application catalogue\* is quite extensive, it is nearly impossible for any one individual to know every feature of every Adobe program. Many experienced designers start by mastering a compulsory set of base skills then over time acquire the niche skills they require. Along the way, choose the appropriate program(s) for the project at hand.

***Faculty are encouraged to use  
Camtasia to complete projects.***

**\*An enterprise-level license to the full Adobe catalogue is available to all Sheridan employees.**

# Digital Course Assets

Digital course assets present instructors with many advantages over traditional textbooks. They can provide a hands-on learning environment, rich in animations and graphics, interactive explorations, and embedded assessments that aid, as well as track, student understanding. Digital Course assets promote enhanced critical thinking, digital literacy, and problem solving skills, increase student engagement, and prepare students for real-world career applications of learned material.

## *Consider the Following* When Creating Digital Course Assets:

1. The range of learners who will be accessing your material may vary.
2. The content you develop must be screen-readable, as users may access your content through a tablet or smartphone; how will content look on varied screen sizes?
3. The digital format of final assets. For example, downloadable PDFs that are not protected can be easily shared or copied.
4. Build community and personal relationships with students by creating platforms on Social Media, Slack & Slate to engage in consistent student interactions.
5. *Use Active Learning to engage students online by creating 'Active Learning Components'.*

# Projects Available in S403

## Types of 'Active Learning Components' to Accompany Learning:

1. Pre-Recorded Lectures
2. Educational Videos and Tutorials
3. Podcasts
4. Graphics and Infographics
5. Digital eBooks and Guidebooks
6. Interactive Quizzes
7. Learning Games

## General 'Active Learning Components' Available to Create in S403:

1. Film video footage for a variety of uses
2. Capture audio or voiceover to accompany video or create podcasts
3. Create small graphics or longform infographics
4. Reformat existing content into digital ebooks and guidebooks
5. Edit and composite raw footage, graphics, audio, and effects into lectures or short tutorials

# Projects Available in S403
